

CONGRATULATIONS, BMW.

THANKS FOR TAKING US ALONG FOR THE RIDE.

AS BMW CELEBRATES OVER 100 YEARS OF INNOVATION, Clemson is proud to stand side by side as one of BMW Group's elite international Strategic Partner Universities.

In 2007 it was BMW who understood the vision of CU-ICAR and as a founding partner became the first private-sector resident on the CU-ICAR campus with the BMW Information Technology Research Center. The BMW partnership and support over the past decade has led to more than 100 research projects and sent more than 150 Clemson graduates into BMW.

In the future, Clemson looks forward to providing the next generation of automotive engineers to support BMW's Next 100 Years of mobility.

PRESIDENTS AND PARTNERS:

Clemson President James Clements and Manfred Erlacher, President and CEO of BMW Manufacturing, at BMW University Day at the automaker's headquarters in Munich last summer.
