

**Others have built
time machines
to see the future.**

**The smart ones
ride with us.**

At CU-ICAR, we specialize in what's yet to come. Most universities receive 7% of their R&D funding from industry leaders. CU-ICAR receives over 80%. Why? It's because our partners see our vision – and our uniqueness. They don't see a university campus; they see a hub of industry activity in South Carolina where automotive giants are coming to play. They see the brightest young minds in the entire industry. With CU-ICAR, they see the future.
